THERMAL STABILITY

EXCLUSIVE TORRE ERGOLIFT™ LEVER

ITALIAN ELEGANCE

A domestic machine, with professional components.

Double Independent joystick taps, to delivery steam and hot water for espresso and cappuccino lovers. Electronic Water level control. 1,5 lt boiler with internal heat exchanger that allows the simultaneous delivery of Espresso, Steam and hot water just like at the bar. Temperature control with new TSP system and double pressure gauge to display boiler pressure and pump pressure. Water tank level electronic. Maximum versatility, professional performances, and thermal stability thanks to the E61 group with a new ergonomic and elegant design dispensing lever ERGOLIFT™.
